About GALAXIS

GALAXIS TECHNOLOGY is a Chinese logistics robots and logistic system company headquartered in Zhejiang Province, which dedicates to the innovating and manufacturing of Full Roaming Shuttle System, Stack crane System, Pallet Shuttle System, AMR System and related products and services.

GALAXIS began production of its first Full Roaming Shuttle in 2014, now GALAXIS has been one of the most largest shuttle robot suppliers in China. With five R&D and manufacturing centers based in China, GALAXIS has successively launched 5th generation Full Roaming Shuttle and related equipments includes lifts, conveyors, AMR etc., to help hundreds of clients improve their business.

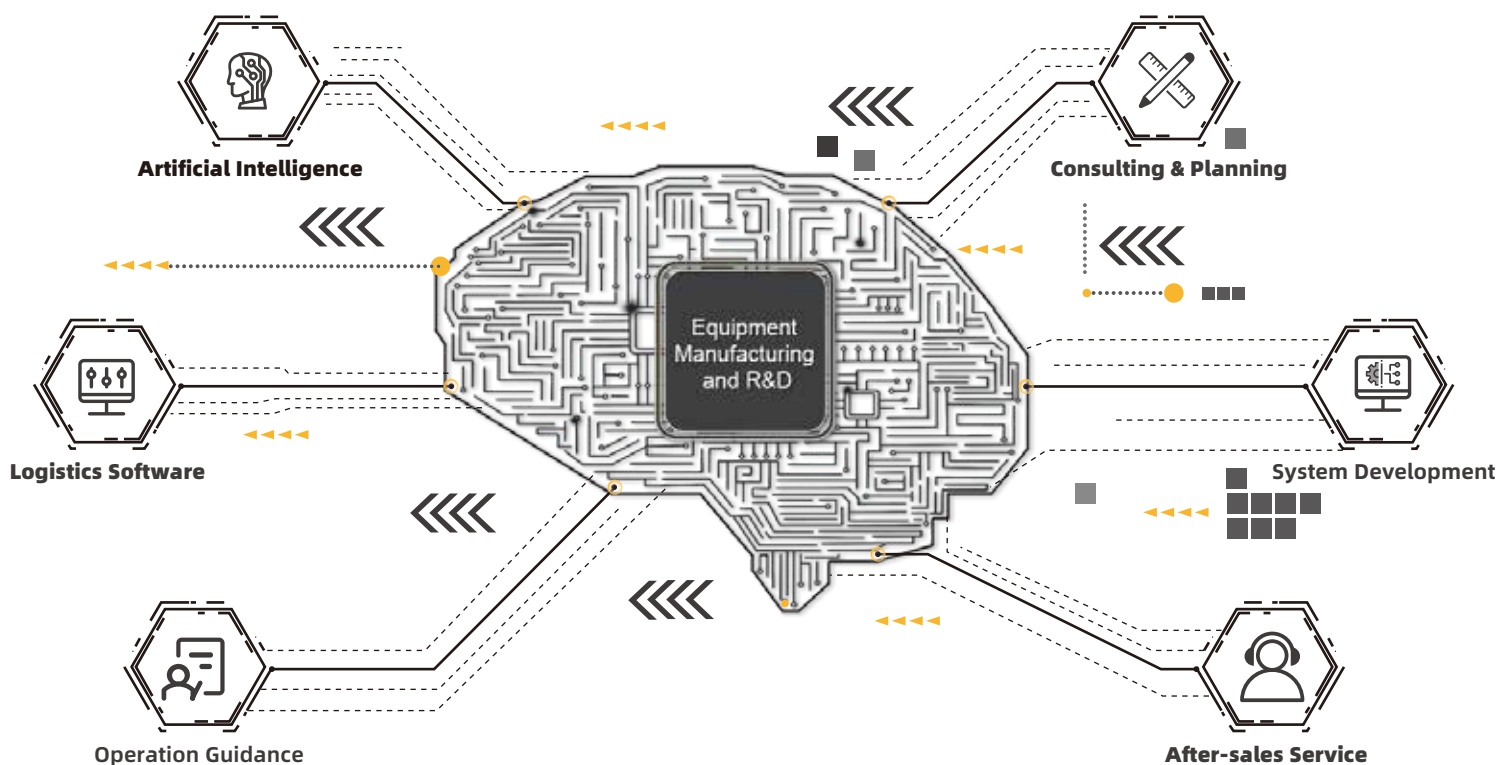

Currently, GALAXIS has implemented over 1000 logistics centers, covering over 20 industries including pharmaceuticals, automotive, fashion, retail, e-commerce, library parts and components manufacturing, and 3PL. GALAXIS has also successfully implemented logistics projects in Japan, South Korea, the United Arab Emirates, Israel, the United States, and Russia.

Our vision is to become the leading provider of logistics robots, intelligent equipment and technology services.

Logistics Equipment

Core Competencies

Project Cases

Japan/E-commerce

Japanese E-commerce company for FMCG, aims to invest in automation equipment to solve the problem of increasing manpower cost, at the same time to balance a series of problems such as project delivery and investment costs.

Warehouse Size
13,000 m²

Warehouse Height
5m x 3 Floor

Storage Location
10,976

System Throughput
1,920 Tote/hour

Hong Kong/3PL

A 3rd party logistics facility built and operated by HKSTP for its advanced manufacturing centre in Tseung Kwan O Industrial Estate, providing integrated logistics services to the enterprises settled in the center.

Warehouse Size
319 m²

Warehouse Height
8.7m

Storage Location
6,192

System Throughput
350 Tote/hour

Dubai/E-commerce

GALAXIS has developed a tote AS/RS solution for a home appliance warehouse located in Dubai. Shuttles can operate at a high temperature of 45 C , with over 100,000 storage locations, greatly improving warehouse space utilization and effectively reducing labor costs.

Warehouse Size
2,500 m²

Warehouse Height
19.5m

Storage Location
122,424

System Throughput
140 Tote/hour
